

FBLOCK

- Procurement of FBLOCK specific to SuperB and possibly to the tau-charm factory linked to construction of an FDIRC prototype with final design
- Necessitates a collaboration and support to completion with
 - Detectors
 - Electronics
 - Mechanics
 - => needs support from INFN to be useful
- SuperB not funded => INFN R&D activity funding has been frozen and will be re-discussed in January
- => we have put on hold the procedure for the procurement of the FBLOCK
- Support from INFN for the FBLOCK can be resumed but will need to be motivated

MaPMT

- Testing of R11265-100-M64
- Readout with CAEN V1742 digitizer (5Gsamples/s)
 - Low level driver, raw data DAQ, pedestal calibration, waveform processing OK
 - Time calibration TO DO
- PMT Scanning system in progress
