

Experimental Review on Lepton Universality and LFV tests at a B-factory

Thursday, 24 May 2007 12:50 (30 minutes)

Since 1999, the B-factory Collaborations, Babar and Belle, have accumulated and studied large samples of tau lepton pairs. The experimental results on Lepton Universality checks and Lepton Flavour Violation searches will be reported.

Presenter: Dr LUSIANI, Alberto (INFN - Pisa)

Session Classification: Session V

Track Classification: Lepton Universality and LFV
