Papers Special Issue experience (self-criticism)

Problems	Possible solutions
Chaos on the list of authors (last minute)	Corresponding author who clarifies this with the group leader (at the beginning of drafting, not at the end)
Articles submitted without proofreading	Send articles to the authors list at least 2 weeks before final submission
Avoid last-minute changes	
A reminder is sent to the list of authors informing them to start writing, and give a couple of them access to the overleaf writing template	
ALL authors must give their approval and, if possible, constructive feedback (otherwise they will be removed from the list of co-authors)

During the review process...

The corresponding author is not alone! Involve the rest of the co-authors in this process:

1. Share the reviewer comments with all co-authors.
2. Develop a strategy for responding to the comments and assign tasks to each co-author accordingly.
