

# Young Researchers Meeting In Rome 2012

## Friday, 20 January 2012

### Session - III : Astrophysics (14:20 - 16:10)

time	[id] title	presenter
14:20	[10] Distance and Geometry of the Magellanic Clouds using the Period Wesenheit Relations of Classical Cepheids	
14:40	[11] Optical identifications of celestial high energy sources with the Telescopio Nazionale Galileo	
15:00	[12] Galaxy clusters mass measurements techniques	
15:30	[28] Fisher constraints on isocurvature models: axion and curvaton scenarios	
15:50	[14] Evolving X-ray Polarimetry towards high energy and solar science
