CYGNO simulations update

Giulia D'Imperio

06/03/25

Simulation tasks

- CYGNO-04 simulations:
  - updated CAD design for simulations released on 05/03/25 (not yet updated on github)
  - field cage simulations completed (see Melba's presentation), $O(10^5)$ events/year but activity measurements with HPGe are upper limits ➡ ICP-MS needed
  - calibration simulations in progress (see Zahoor's slides at last simulation meeting)

- AmBe data/MC comparison:
  - first MC truth studies shown at last simulation meeting (see Pietro's slides)

- Next meeting on Monday 10/03 at 14.30
