Summary from Slow Control Discussions

XLZD Collaboration Meeting, LNGS
Breakout Session 1
Slow Control (vs DAQ & Computing)

Interfaces first

- We realise that our interfaces are the first and most important point
    - Some of that realisation thanks to the group we were in with
    - Need to create well-defined boundaries to other subsystems/sites/whatever
- Discussion raised importance of site interactions
    - Need contacts per site to start the conversation of external:
        - Requirements
        - Wishful thinking
