

Starting Meeting
of the
Working Group
on
Radiative Corrections and Generators
for
Low Energy Hadronic Cross Section
and
Luminosity

FRASCATI

16-17 October 2006

The objectives

- ▶ Stimulate a collaboration
- ▶ Put together a list of problems to be solved
- ▶ Put together experimentalists and theorists
- ▶ Try to have a wish list from experimental side
- ▶ Try to figure out:
IF, BY WHOM and WHEN
that wish list can be filled with an efficient software

The proposed subjects - working groups

- ▶ Monte Carlo generators for Luminosity
- ▶ Monte Carlo generators for e^+e^- annihilation into leptons and hadrons
- ▶ Monte Carlo generators for e^+e^- annihilation into hadrons plus an energetic photon from initial state radiation (ISR)
- ▶ Monte Carlo generators for τ production and decays

Starting meeting - some expectations

- ▶ set a general structure of the WG
- ▶ set a long term schedule
- ▶ try to form subgroups and their conveners
- ▶ make a list of objectives
- ▶ establish a web page with links to the available software, meetings etc.
- ▶ try to develop strategy how to attract more people
