

EUROPEAN RADIATION RESEARCH 2012

Wednesday, 17 October 2012

Normal Tissue Damage - Hall "E" (10:00 - 12:30)

time	[id] title	presenter
10:00	[70] Cardio-pulmonary consequences of thoracic irradiation in rats	Dr VAN LUIJK, Peter
10:30	Coffee break	
11:00	[10] Normal tissue damage – models of second tumor induction after radiotherapy	Prof. SCHNEIDER, Uwe
11:30	[147] Ionizing radiation induces acute and chronic modifications of the transcriptional profile of endothelial cells: A Molecular-functional system biology approach	Dr MILLIAT, Fabien
11:50	[186] FISH analysis of chromosome damage in whole blood as indicators of late radiation toxicity after radical radiotherapy in prostate cancer	Ms BEATON, Lindsay
12:10	[210] TP53INP1 gene is implicated in radiation-induced senescence	Dr HEGYESI, Hargita
