

EUROPEAN RADIATION RESEARCH 2012

Thursday, 18 October 2012

Awardees 1 - Main Hall (13:30 - 15:45)

time	[id] title	presenter
13:30	[21] Molecular genetic markers for assessment of individual radiosensitivity of cancer patients	SOBOLEVA, Irina
13:45	[27] Hsp90 Inhibition with NVP-AUY922 Protracts Tumor Growth and Prolongs Median Survival of Xenograft Tumor Bearing Mice after Radiation	Mr KUGER, Sebastian
14:00	[33] Direct and inverse dose and dose rate effects of low dose pulsed X-rays on DNA double-strand breaks repair in human cells	Dr VASILYEV, Stanislav
14:15	[36] NVP-AUY922 and NVP-BEP800 selectively radiosensitize tumor cell lines but not normal skin fibroblasts	Ms NIEWIDOK, Natalia
14:30	[39] Telomere length does not correlate with radioresistance in human TK6 lymphoblasts	Dr BERARDINELLI, Francesco
14:45	[43] Age-related alterations in stress-response gene expression induced by chronic low-dose gamma-irradiation in <i>Drosophila melanogaster</i>	PLYUSNINA, Ekaterina
15:00	[44] Effect of low doses of high-LET radiation on mice and their offspring in vivo	Ms SOROKINA, Svetlana
15:15	[136] Application of the FISH technique to estimate individual susceptibility to radiation	Dr MISZCZYK, Justyna
15:30	[208] A canonical non-homologous end-joining pathway involving CtIP-dependent end-resection promotes chromosome translocation formation	Ms KÜNZEL, Julia
