Session 2

Session | **Location:** INFN-LNL, Viale dell'Università, 2, 35020 Legnaro PD | **Convener:** Andrea Gottardo

09:00–09:20

Investigating Structures in ^{124}Te via Coulomb Excitation

Speaker

Andrew STUCHBERY

09:20–09:40

Study of $11/2^-$ isomer in neutron-rich $N = 126$ nucleus ^{203}Ir

Speaker

Gaolong Zhang

09:40–10:00

Evolution of the Octupole collectivity in ^{152}Gd

Speaker

Fanfei Zeng

10:00–10:20

Using Coulomb excitation to study the low-lying structure of ^{104}Pd

Speaker

Naomi Marchini

10:20–10:40

Shapes and collectivity near magic nuclei: Coulomb excitation of ^{62}Ni

Speaker

Katarzyna Hadynska-Klek

10:40–11:00

Exploiting two-proton transfer reactions for probing shape coexistence

Speaker

Julgen Pellumaj

11:00
