ET-Symposium in Croatia

- ET Annual Meeting in Croatia (<https://indico.ego-gw.it/event/916/>)
- Please let me know if you want to go (particularly through INFN)
- Abstract submission is closed, we have some on site characterization but nothing on R&D and data analysis, let's aim to have something at the Symposium next year

News from the Collaboration Board

- Both current spokesperson, Michele Punturo (INFN PG), and Collaboration Board Chair, Eugenio Coccia (IFAE, GSSI), will finish their mandate within less than a year. Start thinking about candidates...

Papers

- Some of you asked about publication policies for «non-collaboration» papers, e.g. R&D activities, analysis simulation, etc
- Be aware that as a member of the ET collaboration, any paper related to ET must go through the collaboration first via the relevant board/division (it is not a review, more a way to make your colleagues aware)
- It goes both ways, you also have access to someone else work
- Please let me know if you have plans in this sense
