Padova, 10 May 2026

Dear Friends,

We are writing in connection with the every-two-year informal meeting on “Selected Topics in Nuclear and Atomic Physics”, traditionally held in Fiera di Primiero, in the Italian Dolomites. The twentieth edition is planned from Friday October 2nd to Tuesday October 6th, 2026.

The meeting is traditionally based on a series of lectures on different subjects. The speakers of this edition are:

- Oscar Adriani (University and INFN, Firenze)
- Danilo Gambacurta (INFN, LNS)
- Faïrouz Hammache and Nicolas de Séréville (IJCLab, Orsay)
- Yurj A. Litvinov (FAIR, GSI, Darmstadt)
- Frédéric Nowacki (IPHC, Strasbourg)

The regular lectures may be supplemented, as in previous occasions, by seminars on topics of general interest.

All participants will be hosted at the Hotel “Conca Verde” and are invited to reach Fiera di Primiero during Thursday, October 01st and the hotel will be available until Wednesday morning, October the 7th. The total cost of participation, full pension, is 600,00 Euro, including the social dinner. Details on the payment of the fee will be soon available on the website of the meeting: <https://agenda.infn.it/e/Fiera26>.

As you well know this is a small gathering, run at a minimum budget. Because in Fiera di Primiero we must deal with a commercial hotel for everybody's accommodations, it is crucial to have an accurate view of how many will actually come. So if you, or some in your group, is interested in coming, please register at the earliest at the web site and inform the organizers by e-mail fiera26@lists.pd.infn.it.

If necessary, some supports for the accommodation of young people can be provided.

Best Regards,

Carlos H. Dasso, Edoardo G. Lanza and Daniele Mengoni
