

Gravity, the Universe and Everything

Topic: Looking at gravitational waves at cosmic distances

Gravity, the Universe and Everything is a season of seminars aimed at connecting, in an informal and safe environment, researchers and students interested in gravitational-wave physics.

March 4, 2026
Conversi lecture room
Marconi Building

Register if you want to be counted for coffee and cookies

Programme

16.00 - 16.30: K. Leyde (CCA/Flatiron Institute) - *Machine Learning for gravitational wave cosmography*

16.30 - 17.00: U. Dupletsa (Austrian Academy of Sciences) - *The present and future of GW cosmology*

17.00 - 17.30: L. Piccari (Sapienza University) - *Enabling multi-messenger observations*

17.30 - 18.00: *Coffee, cookies and open discussion with the speakers*
