

XII International Conference on Hadron Spectroscopy - Hadron07

lunedì 8 ottobre 2007

Poster - Conference Gazebo (13:30 - 14:30)

[id] title	presenter	board
[21] Semileptonic weak form factors in semirelativistic quark potential model	MATSUKI, Takayuki	
[95] Glueball option for X(1835)	HADJIMICHEF, Dimiter DA SILVA, Mario Luiz Lopes	
[28] Bottomonium masses, decay rates and scalar charge radii	PANDYA, Jignesh N	
[59] Multiquark description of open-charm mesons	VALCARCE, Alfredo	
[111] Rho-like mesons from analysis of the pion-pion scattering	Dr. SUROVTSEV, Yury	
[104] Kaon Photoproduction on Deuterium using Polarised Photons with CLAS	JOHNSTONE, Russell	
[175] Stability of the Solutions of Salpeter Equations with Confining Interactions	LUCHA, Wolfgang	
[228] In-medium omega meson mass and quark condensate in a Nambu-Jona-Lasinio model constrained by recent experimental data	CAILLON, Jean-Christophe	
[9] Analytical Determination of the magnetic moment of the Delta-resonance and screening in the bremsstrahlung reactions	MACHAVARIANI, Alexander	
[47] Testing CP and Time Reversal Symmetries in Lambda(b) Decays into Polarized Resonances	LEITNER, Olivier
