## Low-energy constants and condensates from the V-A spectrum.

*Thursday, 12 September 2013 12:50 (20 minutes)*

We present an analysis of the isospin-one V-A correlator based on our successful description of the OPAL V and A non-strange spectral data. We discuss the values obtained for the ChPT low-energy constants  $L_{10}$  and  $C_{87}$  as well as the dimension-six and eight condensates and compare them with those in the existing literature.
