

Understanding the Higgs

Wednesday, 28 November 2012 - Wednesday, 28 November 2012

Dipartimento di Fisica

Scientific Programme

The workshop will be focused on the discovery of the new boson at LHC and on the current theoretical implications. A general presentation on the importance and the meaning of the last piece of the Standard Model will introduce the discovery. This workshop intends to bring theorists and experimentalists together to make the point on the new data coming from 2012 LHC run and discuss the future perspectives.
