

## ESS Warm linac meeting – January 29<sup>th</sup>, 2013

Laboratori Nazionali del Sud (INFN), via S. Sofia 62, Catania – Round Table

14.00-14.15 Introduction – S. Gammino

14.15-14.45 TDR of ESS Linac and update of the warm section with respect to the baseline – somebody on behalf of S. Peggs

14.45-15.15 Ion source & LEBT - L. Neri

15.15-15.45 RFQ: basic considerations, achievements and criticalities - A. Ponton/B. Pottin

15.45-16.15 MEBT: changes and new functionality - I. Bustinduy

16.15-16.35 Coffee break

16.35-17.05 DTL: higher energy and consequences - A. Pisent

17.05-17.35 Warm linac simulations – M. Comunian

17.35-18.05 Diagnostics – B. Cheymol

18.35-19.00 Discussion on ‘hot’ issues

20.30 Dinner (**please confirm the participation**)

## January 30<sup>th</sup>, 2013

9.00-9.30 Vacuum: constraints and interfaces – P. Ladd

9.30-10.00 Control systems – M. Rescic

10.00-10.30 RF power issues and interfaces – t.b.d. (if necessary)

10.30-10.50 Coffee break

10.50-11.20 Infrastructure integration and interfacing – G. Lanfranco

11.20-11.50 layout integration – H. Danared

11.50-12.20 Costing and limits to in-kind – A. Ponton

12.20-12.50 Scheduling and testbench (where?) – S. Gammino/ A. Ponton

12.50-13.20 Next steps and actions planning - S. Gammino / H. Danared

13.20-14.30 Lunch (**please confirm the participation**)
