

# **International workshop. Cetacean echolocation and outer space neutrinos: ethology and physics for an interdisciplinary approach to underwater bioacoustics and astrophysical particles detection**

## **Saturday, 19 October 2013**

### **Information technology & infrastructures for acoustic data acquisition, archival and analysis (14:30 - 17:00)**

| time  | [id] title   | presenter                    |
|-------|--|------------------------------|
| 14:30 | [19] Underwater acoustics in Antarctica  | KINDERMANN, Lars             |
| 15:20 | [20] Looking for spaghetti in a haystack: Semiautomatic approaches to detecting marine mammals in highly variable noise environments | GILLESPIE, Doug              |
| 16:10 | [21] Look who's talking – classification of whale sounds using the Whale FM Citizen Science project                                  | VON BENDA-BECKMAN, Alexander |
