

WG Effort on a_{μ}^{HAD}

S.Eidelman/T.Teubner/G.Venanzoni

- Data
- Procedures

ECT* Trento, 11-12 April 2013

Data

- Survey on existing data: errors, cov mat, RC,...
- Which set of data?
- Missing channels: parametrization, isospin relations,...
- Other issues?

Procedure

- “Canonical” integration procedure:
 - Different groups use “slightly” different procedure. Which we should use? Our?
 - Differences should be considered as syst error
- Other approaches:
 - Modified Kernel function, Adler function, tau,...?
- Other issues?

Possible approach

- Identify one/two person(s) responsible for this effort
- Identify a few persons in charge for data and for procedure
- This group should meet regularly
- Persons in charge for data should discuss with “experiments” possible questions on data
- The responsible should report/discuss the work at the WG meetings
