

# Trigger On/Offline for NEMO phase 2

+

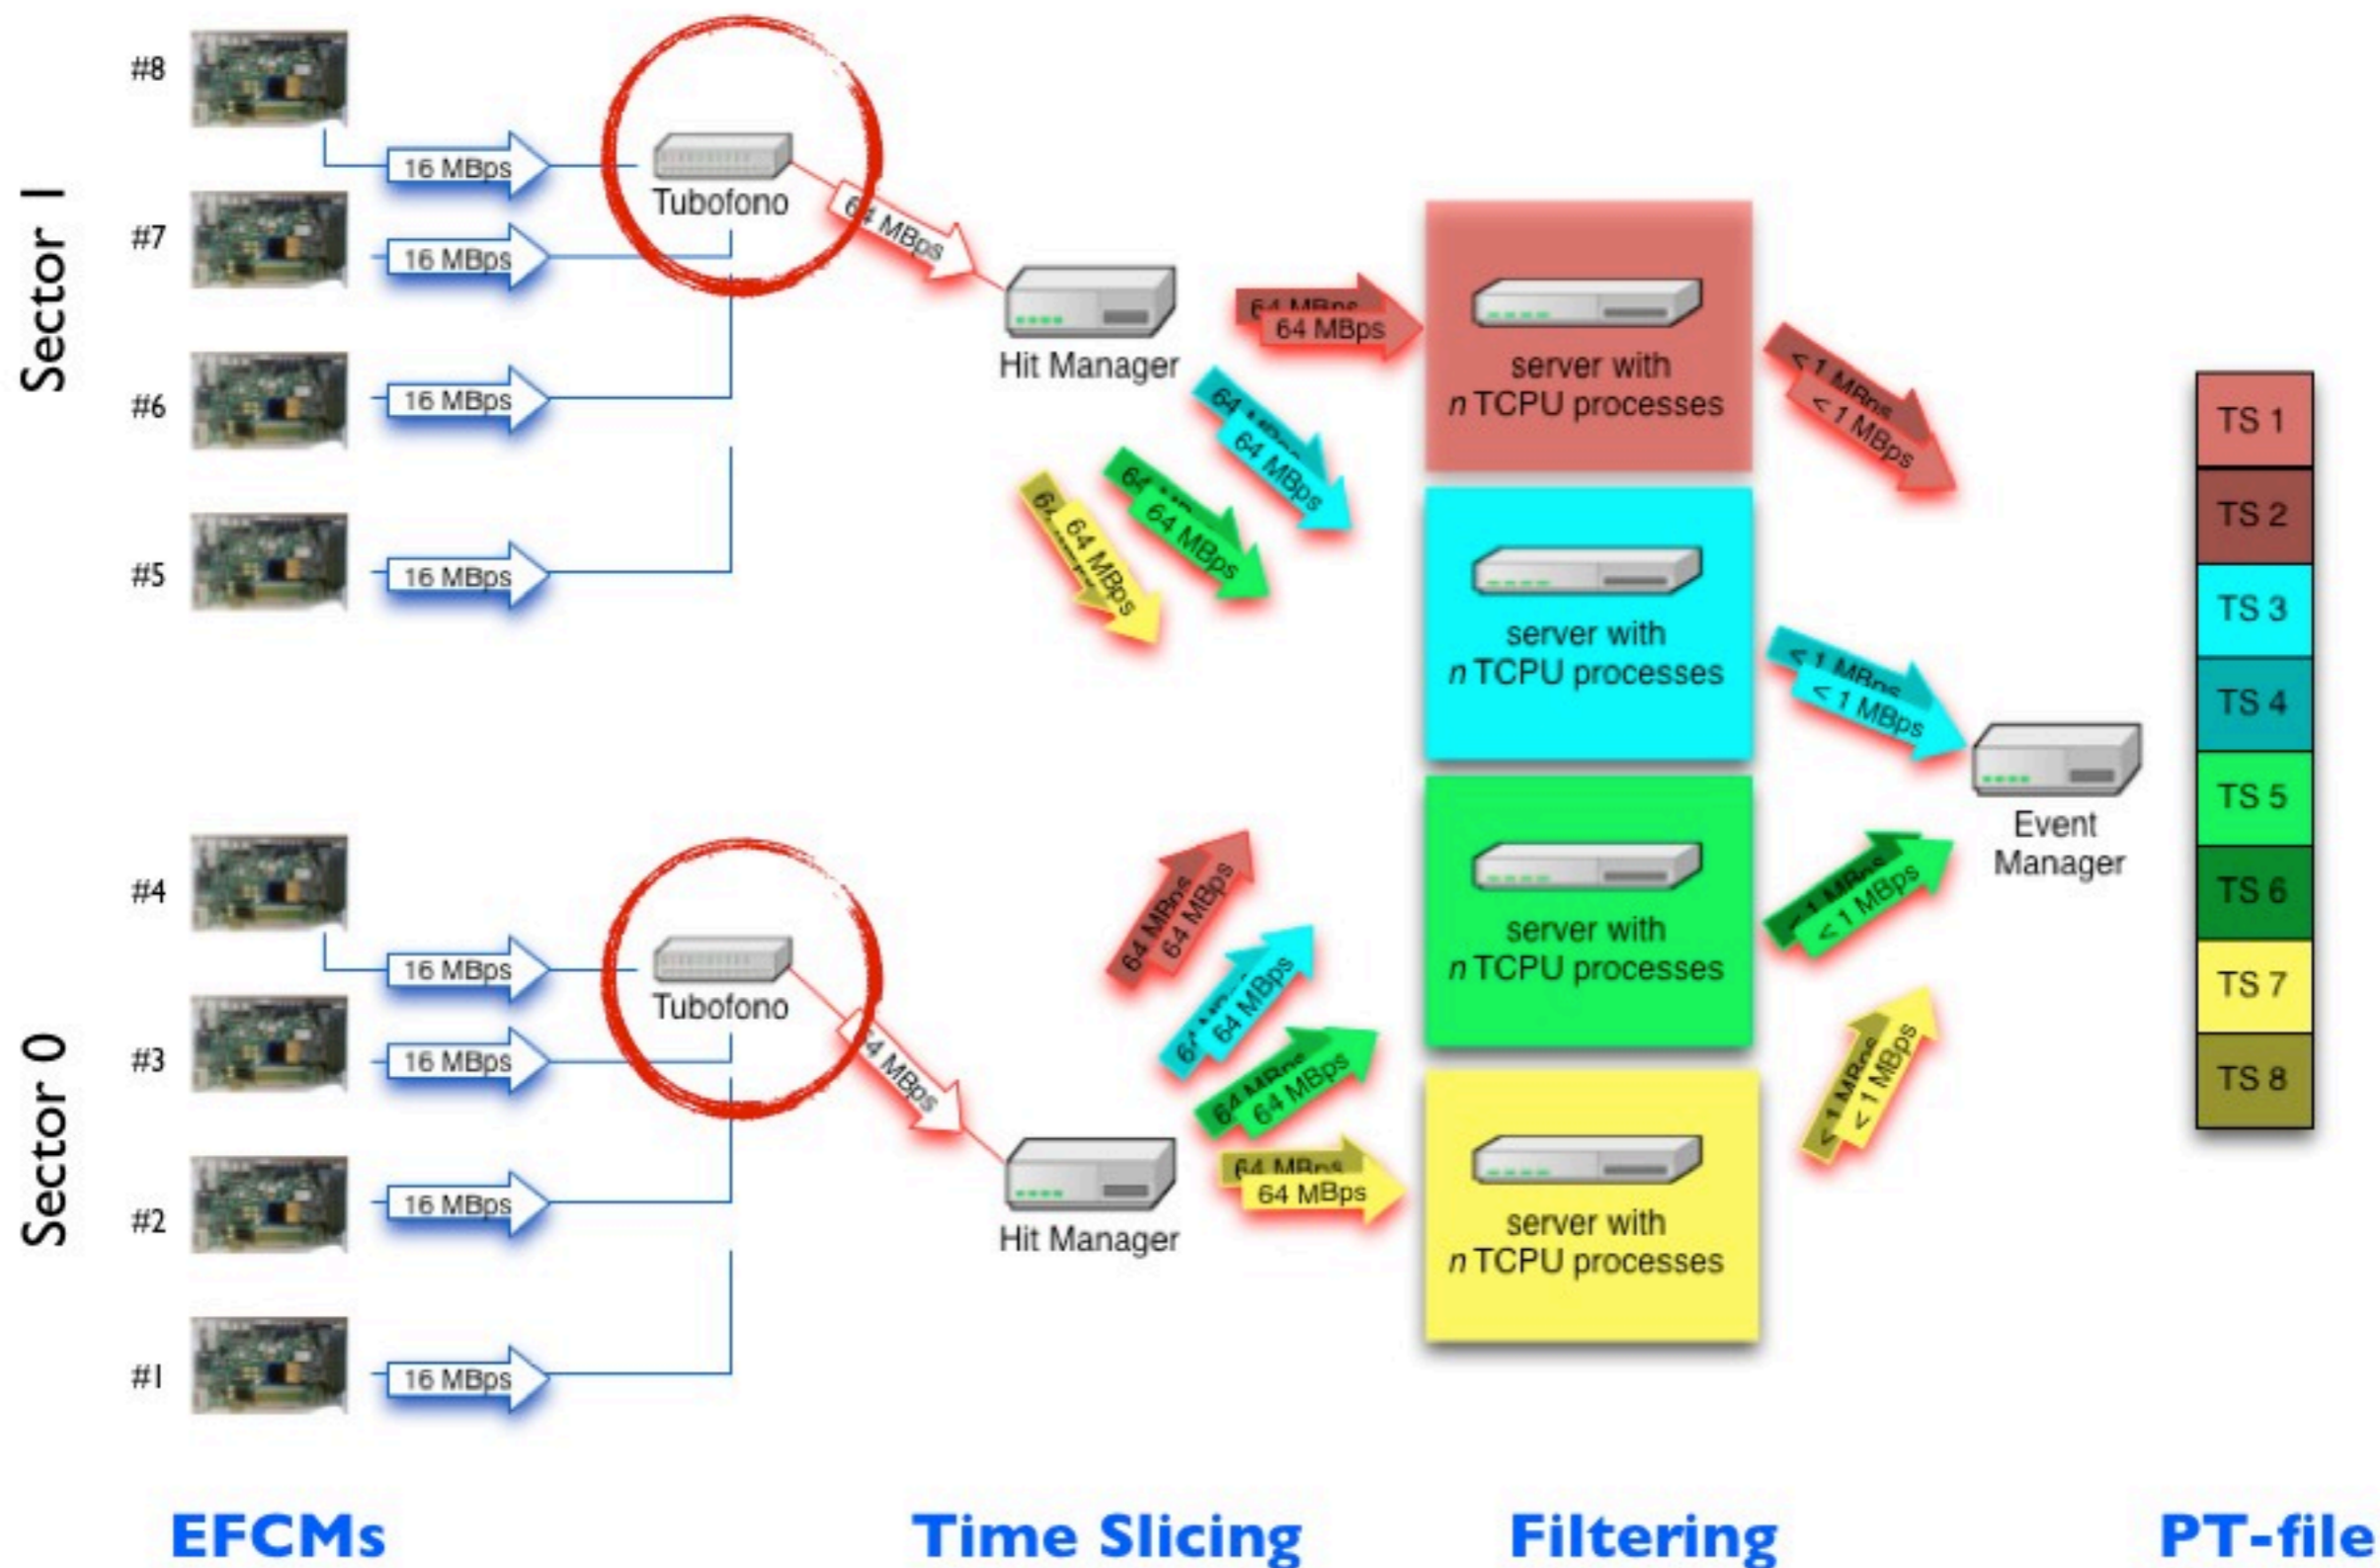

# Starting studies in Bologna

**T. Chiarusi**  
INFN - Sezione Bologna

NEMO Ph. 2 Data Analysis - Rome - 21/06/2013

1

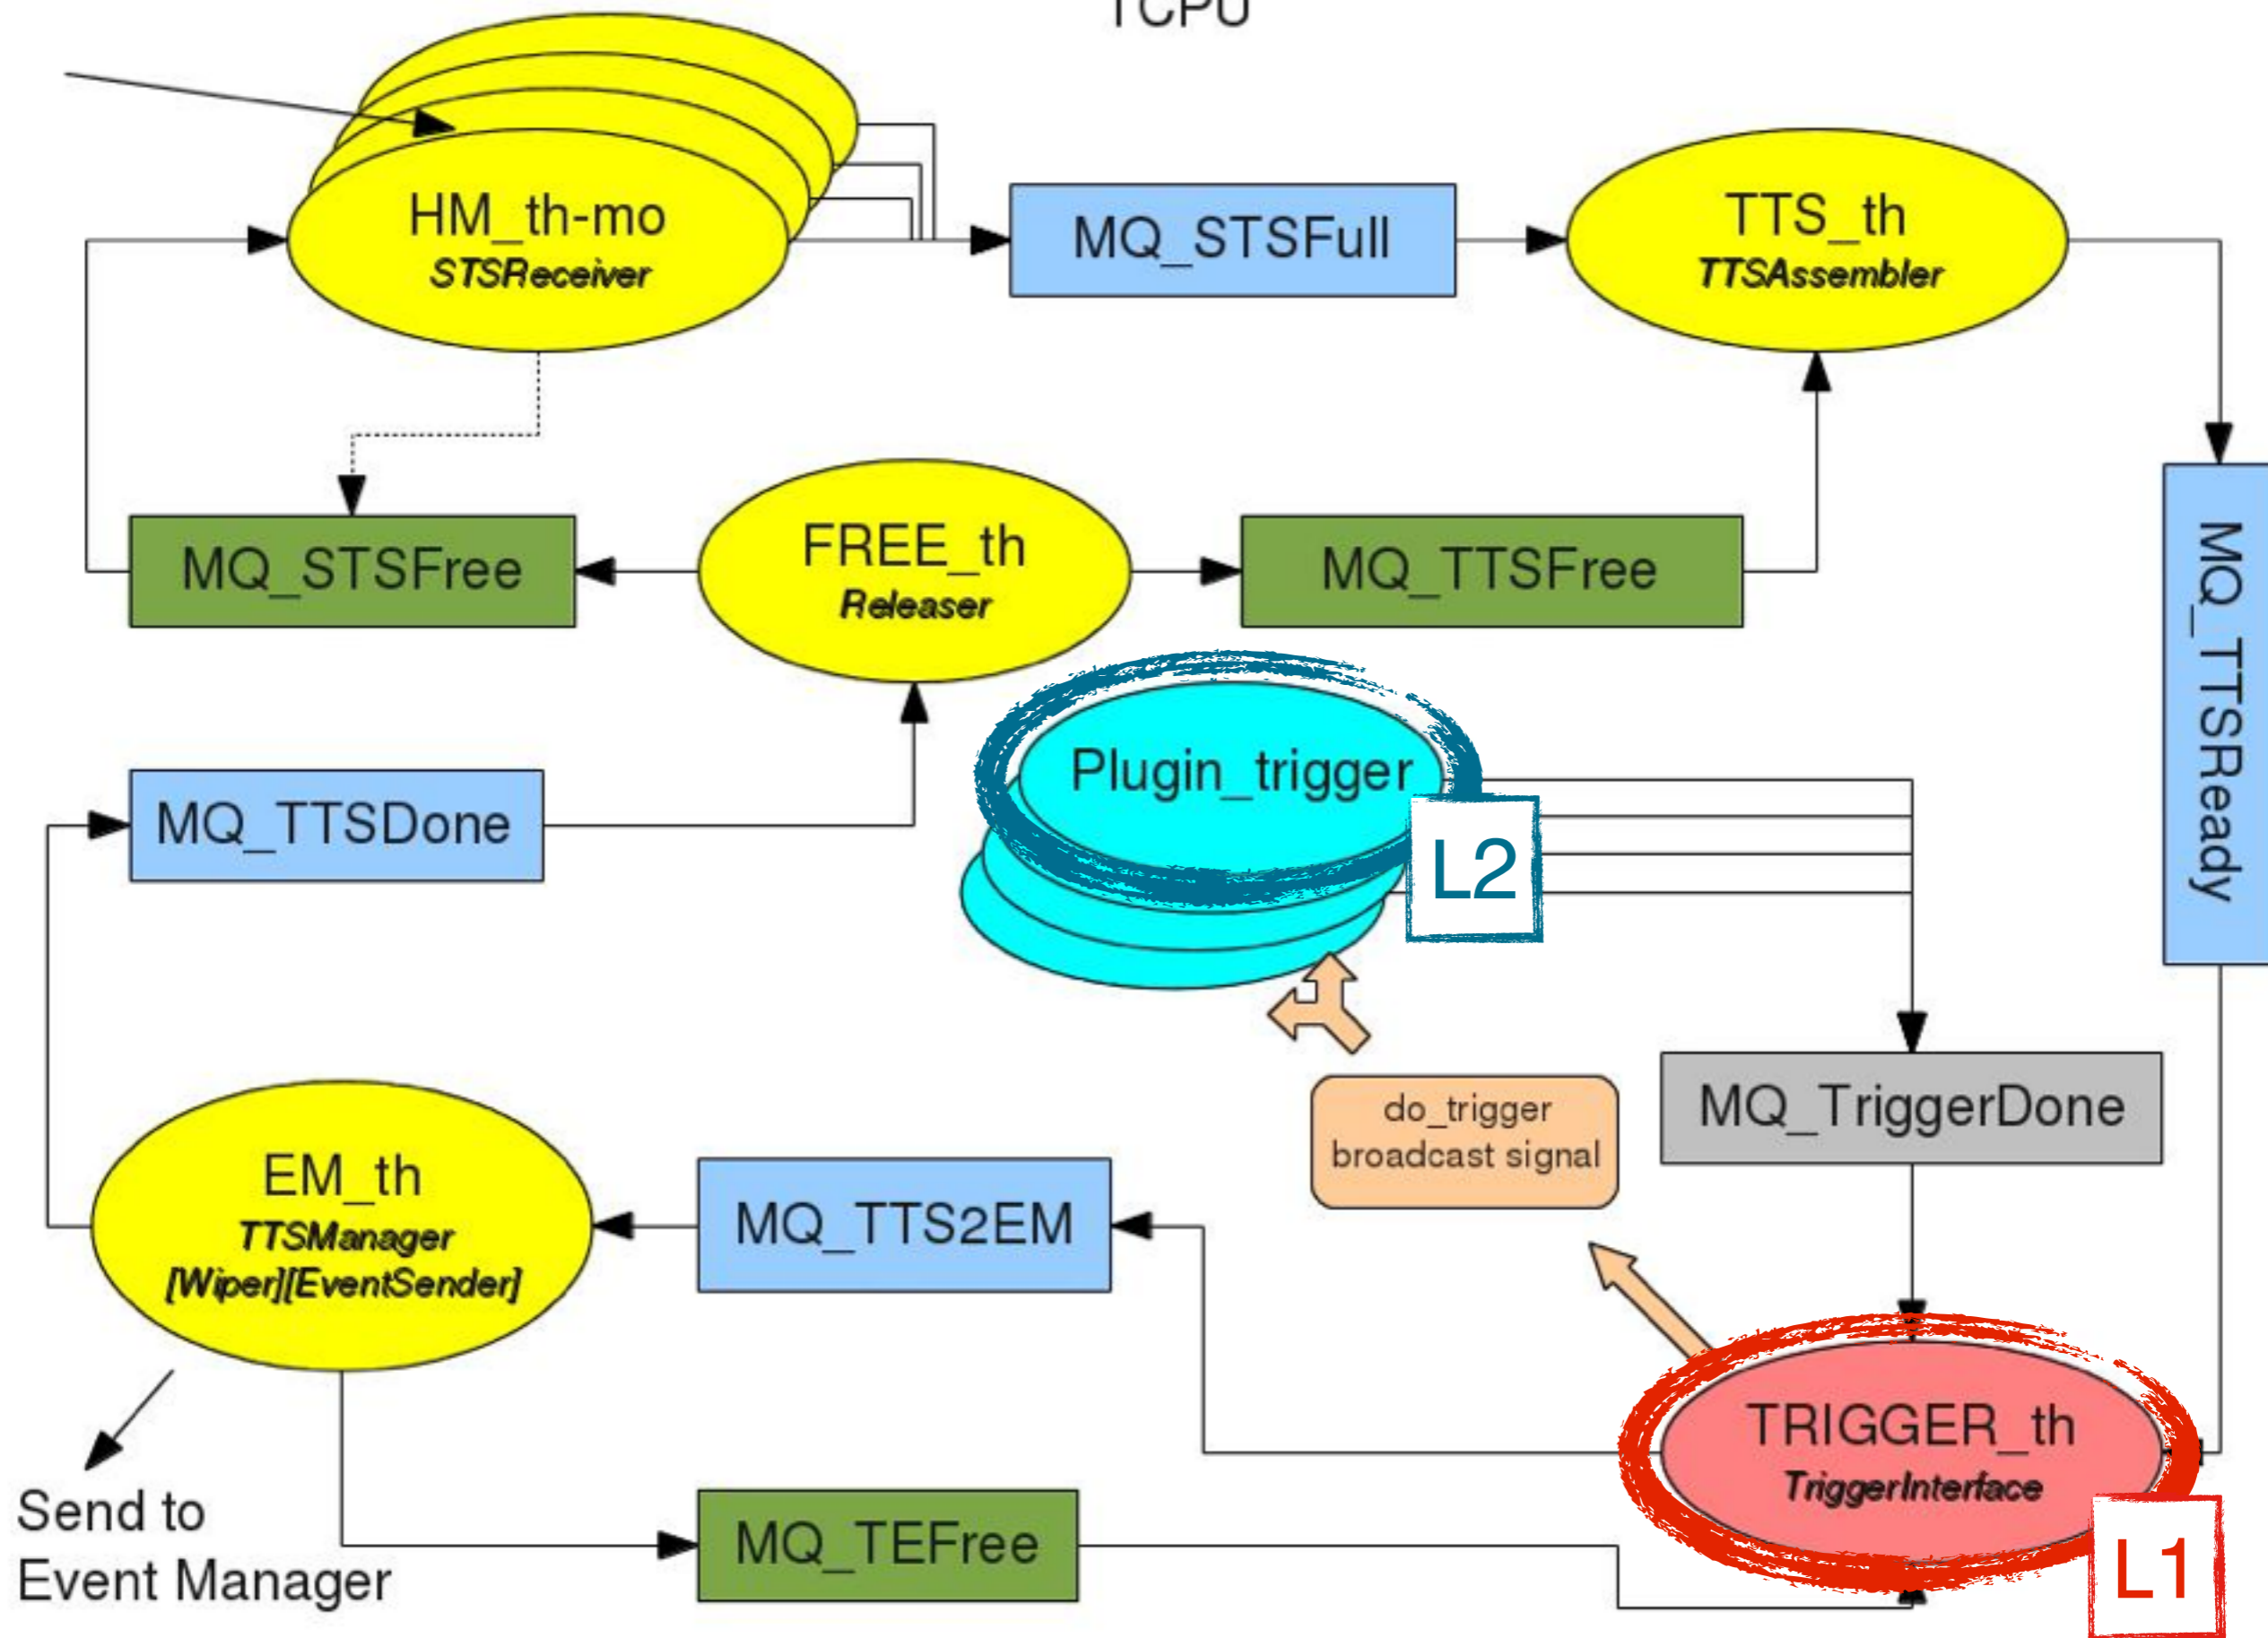

# Please note: each TCP process **DON'T** get directly subsequent Timeslices

Receive from Hit Manager

with G. Terreni

TCPU

# L1 triggers

SC (20 ns)

1:100

FC

(SC in 20 ns + PMT in 100 ns)

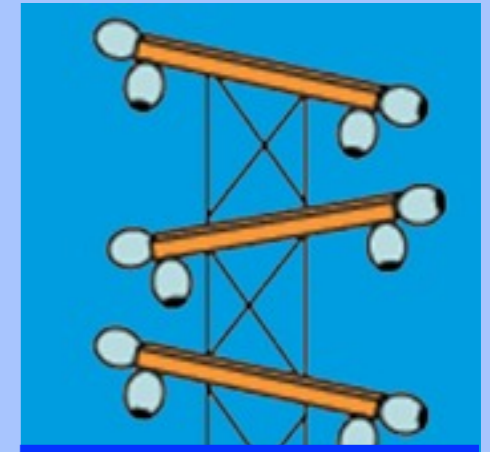

1:10

$Q_{\text{threshold}}$

( $Q_{\text{first10 samples}} > 1000$ )

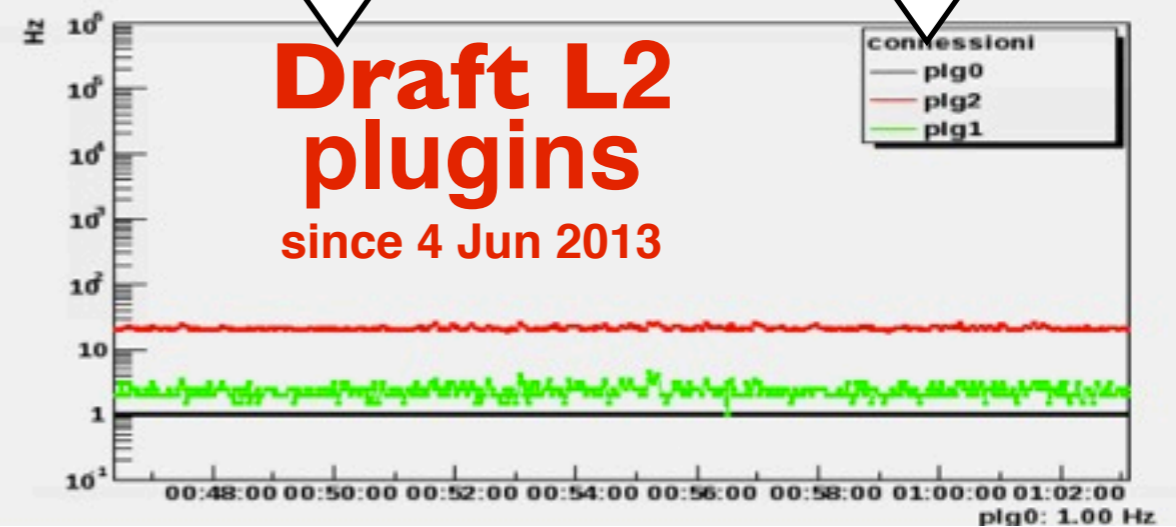

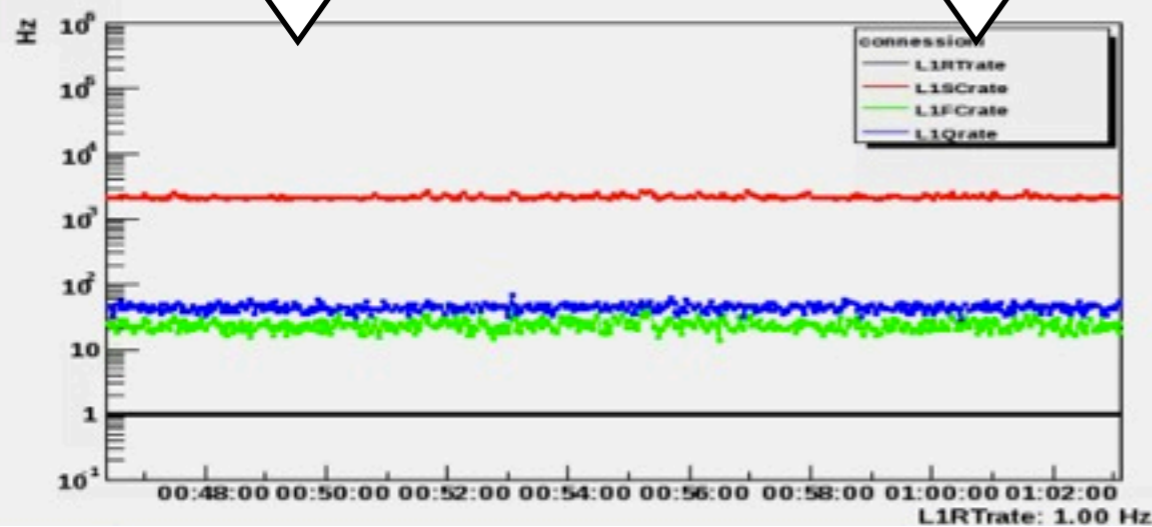

no

Random

(1 ms @ 1 Hz)

1:1

**My proposal waiting for qualified L2 algos**

1:100

1:1

??

1:1

*but all if #SC > 2*

# Further Proposal - **but a MC study is mandatory!**

$T_i =$  average time of the sub-sector

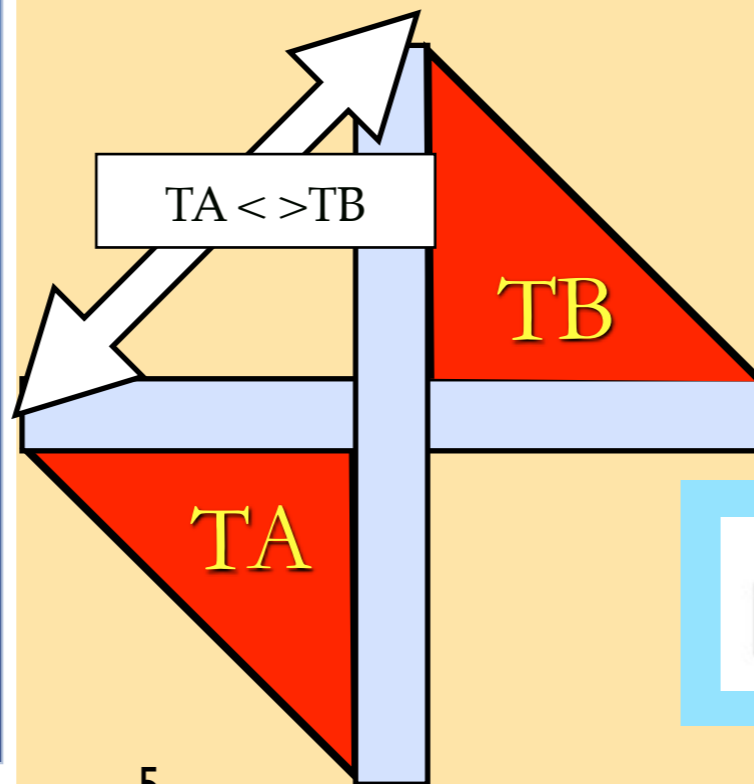

$$T_1 < T_2 < T_3 < T_4$$

$$T_1 > T_2 > T_3 > T_4$$

Or other topologies in plant

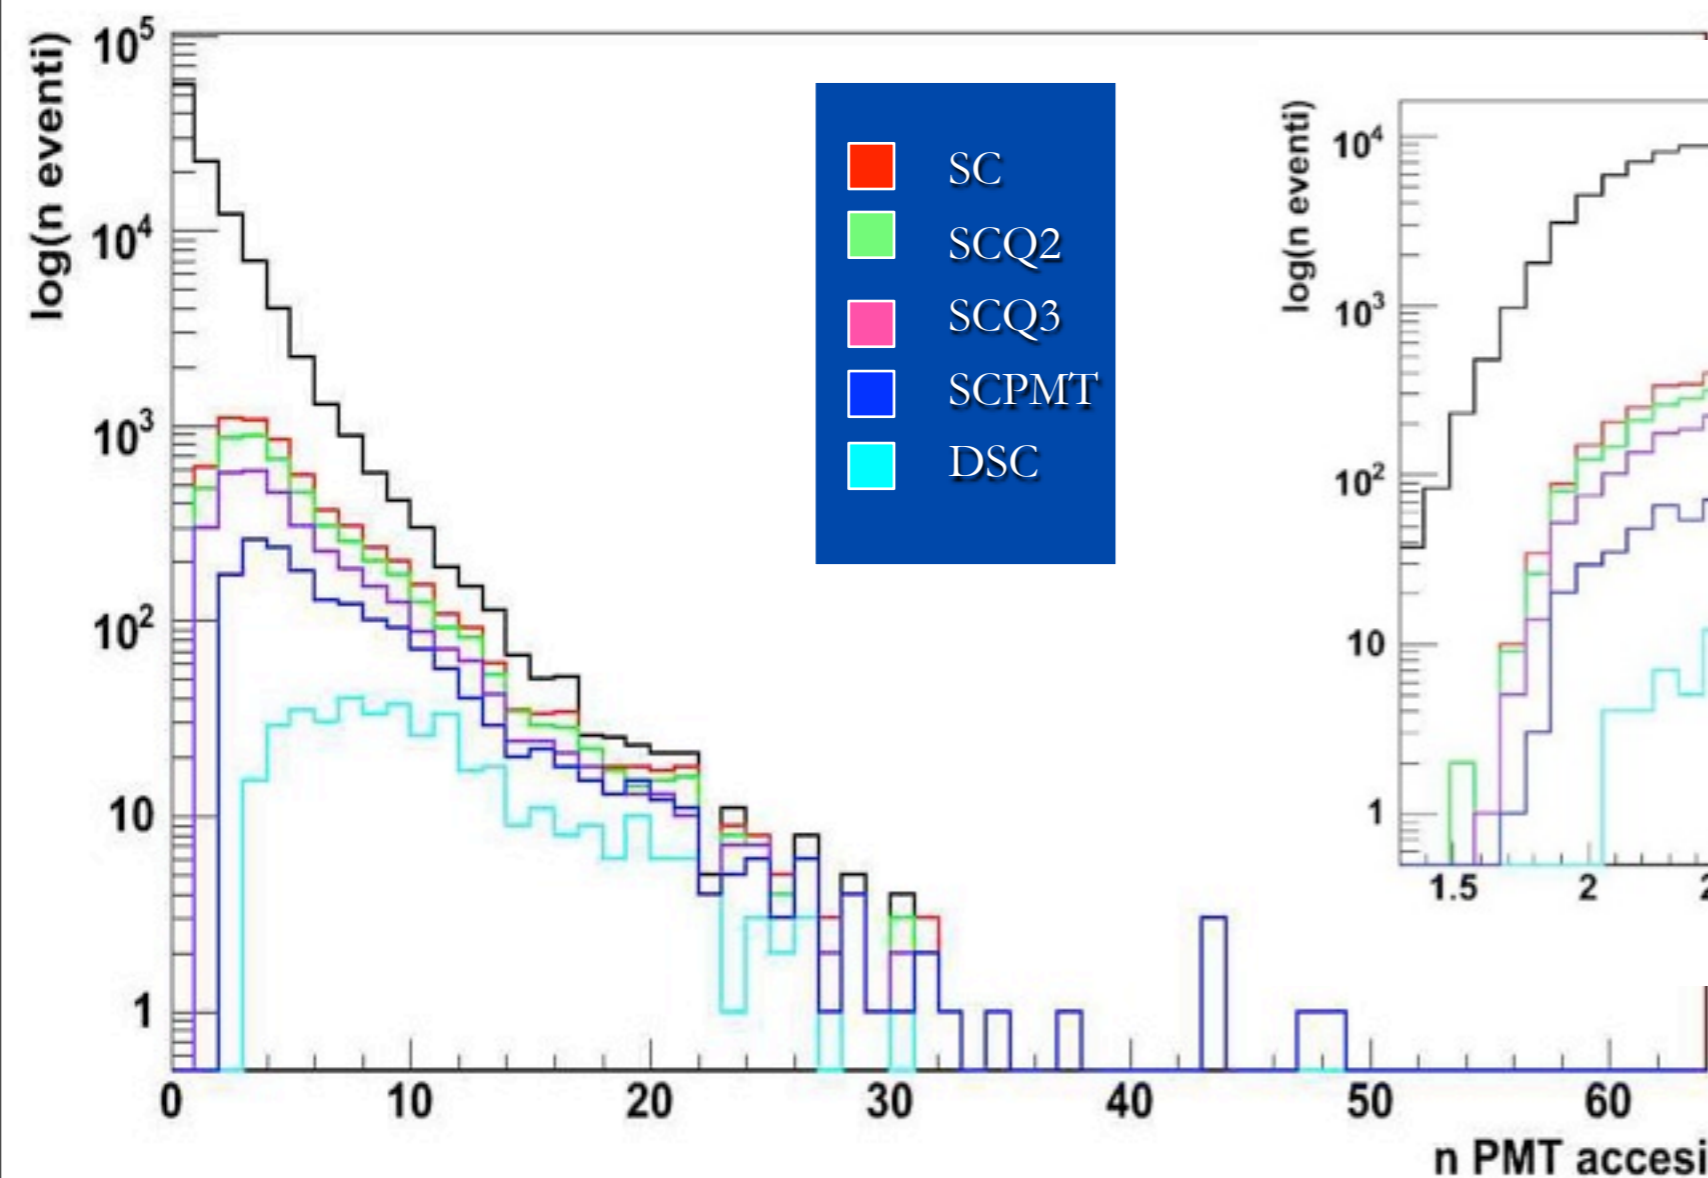

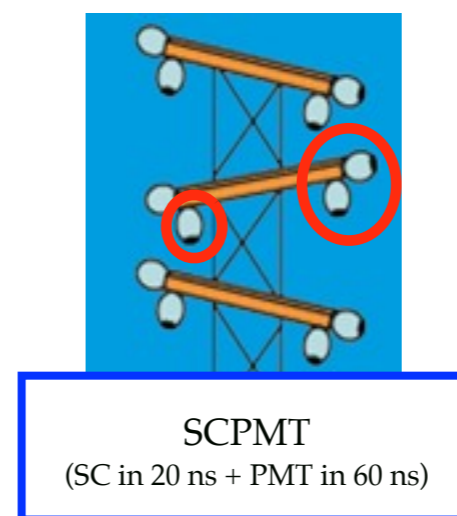

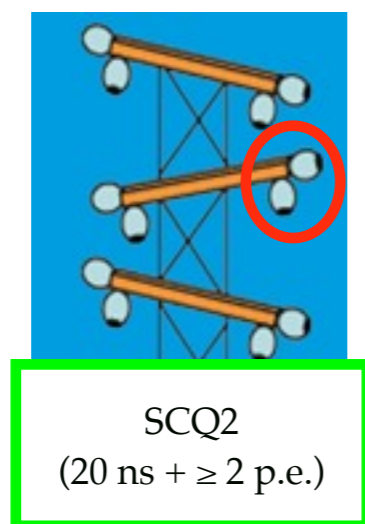

One Further step:  
 1. assume a direction  $\mathbf{d}$ ;  
 2. rotate the Detector so to have  
 $\mathbf{d} \parallel Z$  axis

$$|(t_i - t_j) c - (z_i - z_j)| \leq \sqrt{(x_i - x_j)^2 + (y_i - y_j)^2} \tan \theta_c$$

but 1 Tower is likely not enough

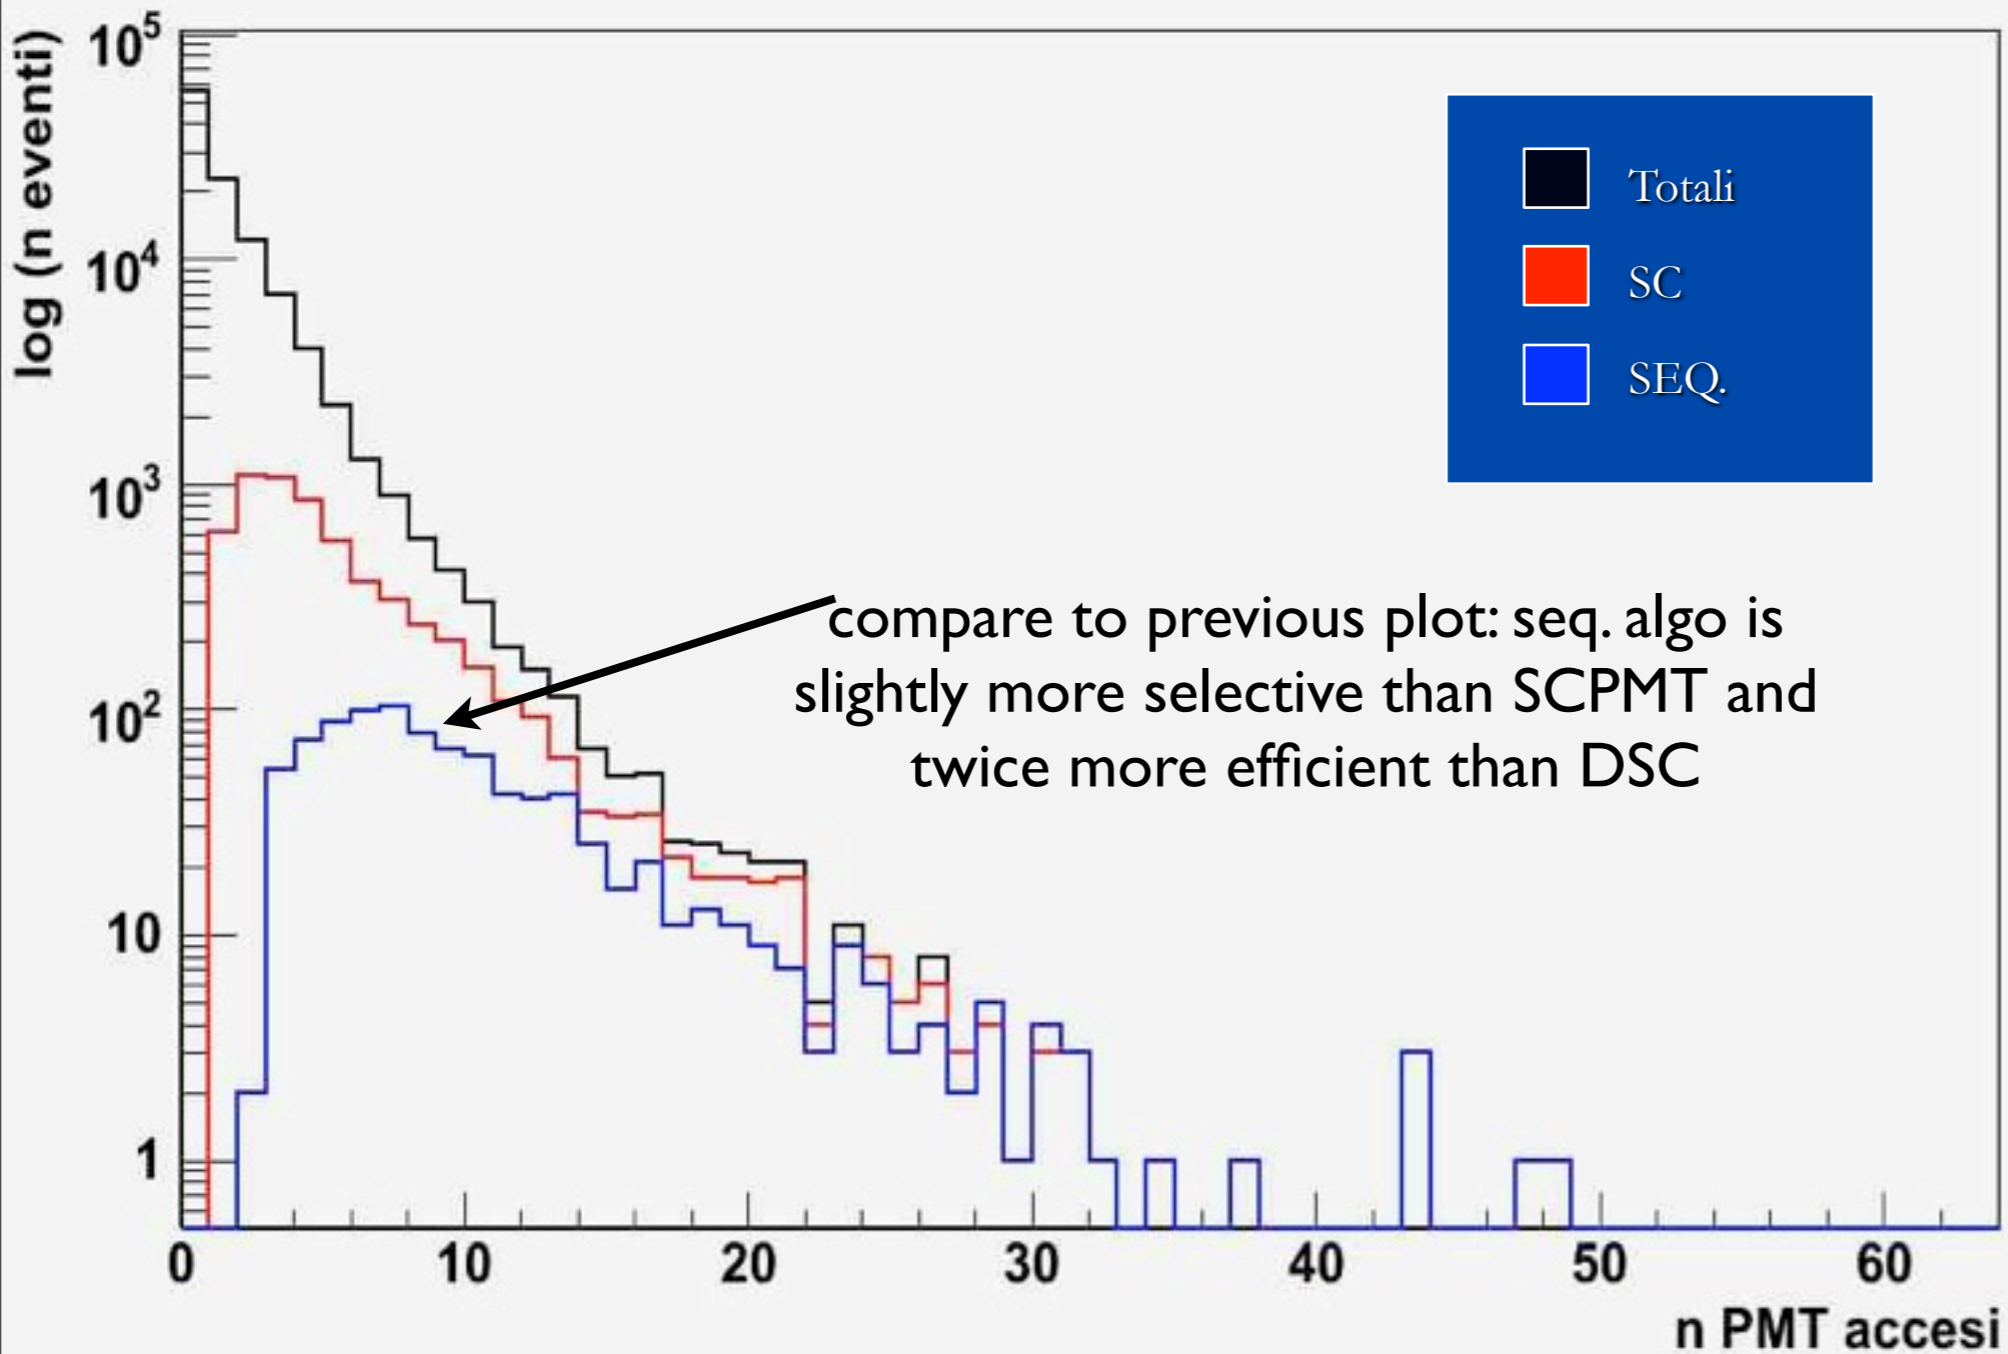

# In **2010** a first kick-off study (only muons no bkg) with the good old 16 floors tower

T. Chiarusi Nemo TB 31/3/2010

# Sequential algorithm

T. Chiarusi Nemo TB 31/3/2010

$T1 < T2 < T3 < T4$

# In Bologna we started a new MC production

with L. Fusco and A. Margiotta

## MUPAGE config

Zmin            -200.        # minimum z in m  
Zmax            400.        # maximum z in m  
CANr            225.        # can radius in m  
EnlargedCANr 100.0        # meters to add to the can radius

Emin            0.004       # minimum energy in TeV  
Emax            1000.0      # maximum energy in TeV

MULTmin        1            # minimum multiplicity  
MULTmax        200        # maximum multiplicity

- Produced **1000 atm. muon files** @ the CAN;
- # events / file : **100k**
- File livetime =  **$1.03 \cdot 10^3$  s**
- Total Live Time: **~11d 22h**

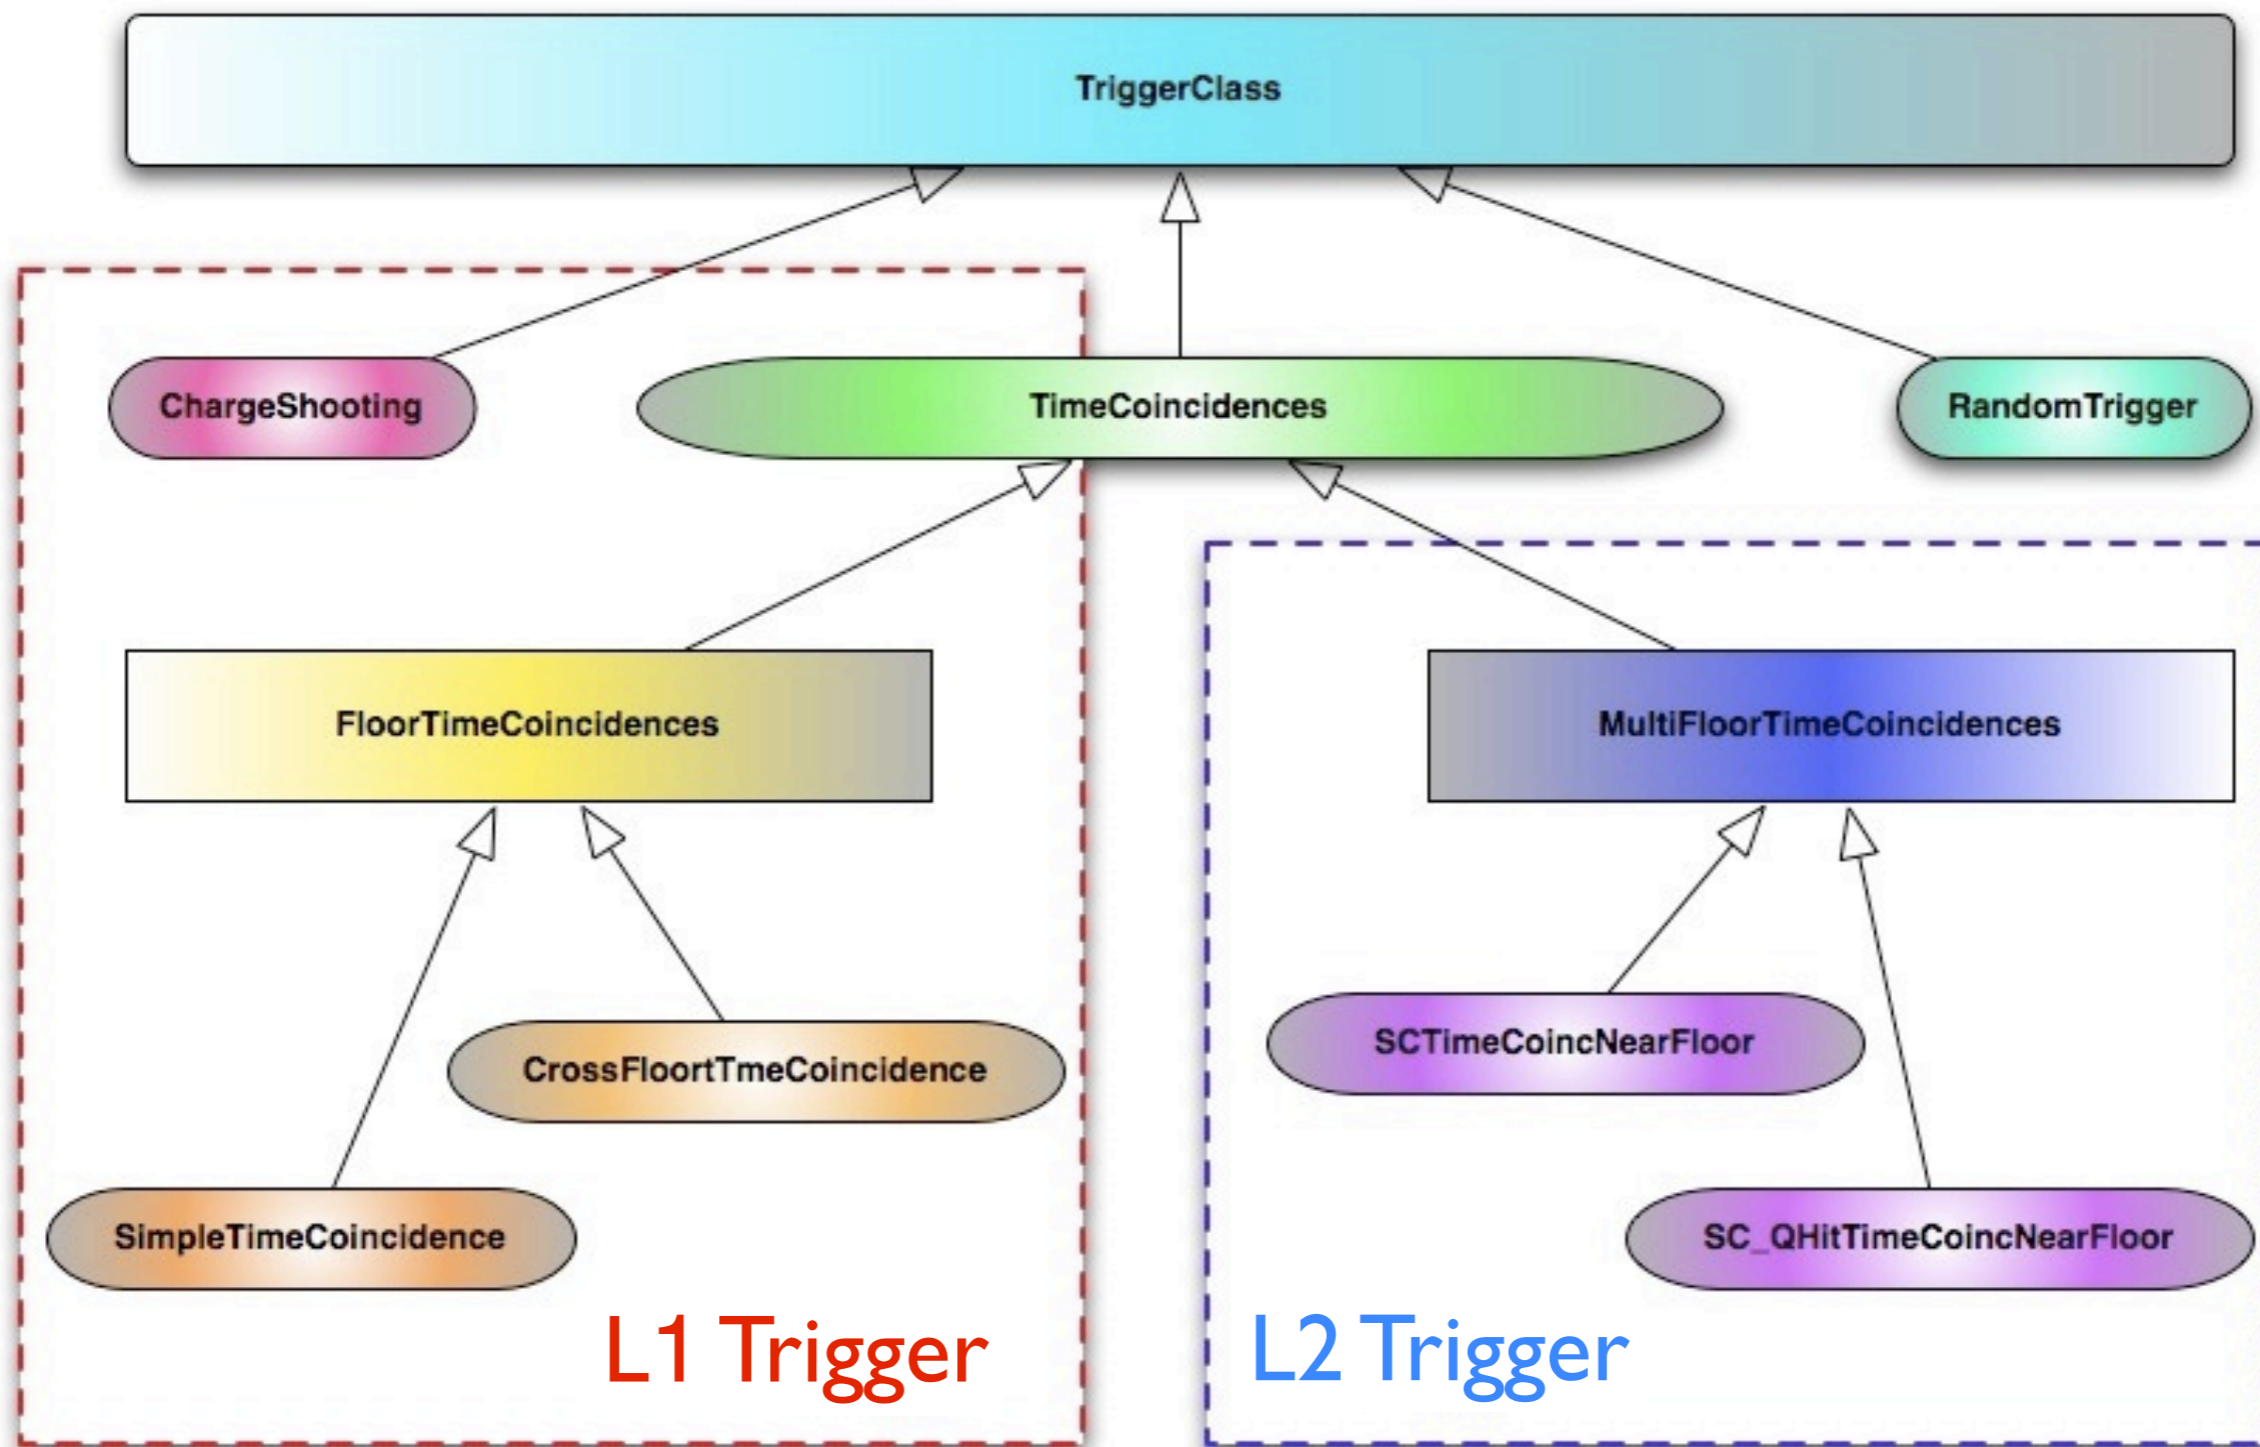

# Manually reconfigured the Geometry file

Waiting for Capo Passero water tables used by KM3

# Offline Trigger inherited from Phase 1

**Warning: THE CLASSES MUST BE REVISED**

**L1 Trigger**

**L2 Trigger**

# Summary

- Trigger On-line is configurable (within the TriDAS frame = Timeslices segmentation)
- Trigger Off-line needs to be customized accordingly (authors must accomplish off-line frame)
- Trigger studies started, simulations required
- muons should come after

# SPARES

# Then, L1 window can be submitted to L2 trigger plugins

with G.Terreni (Pisa)
