

Vulcano Workshop 2014 - Frontier Objects in Astrophysics and Particle Physics

Thursday, 22 May 2014

Neutrino - Therasia Resort, Conference Room (17:00 - 19:55)

-Conveners: Gus Sinnis

time	[id] title	presenter
17:00	[45] Detection techniques for neutrinos and high energy astrophysics	GATTI, Flavio
17:25	[8] Neutrino observations with IceCube	GOLUP, Geraldina
17:50	[50] High-Energy Neutrino Astronomy with the ANTARES Deep-Sea Cherenkov detector and with the future KM3NeT Telescope.	CAPONE, Antonio
18:15	[77] Double Chooz: Towards the near detector phase	STOKES, Lee F F
18:40	[83] The OPERA experiment : new results	SIRIGNANO, Chiara
19:05	[12] Status of neutrino oscillations and sterile neutrinos	GIUNTI, Carlo
19:30	[15] Are IceCube PeV neutrino events extraterrestrial or can be of atmospheric origin?	PETRUKHIN, Anatoly
