

# VBF - News & status

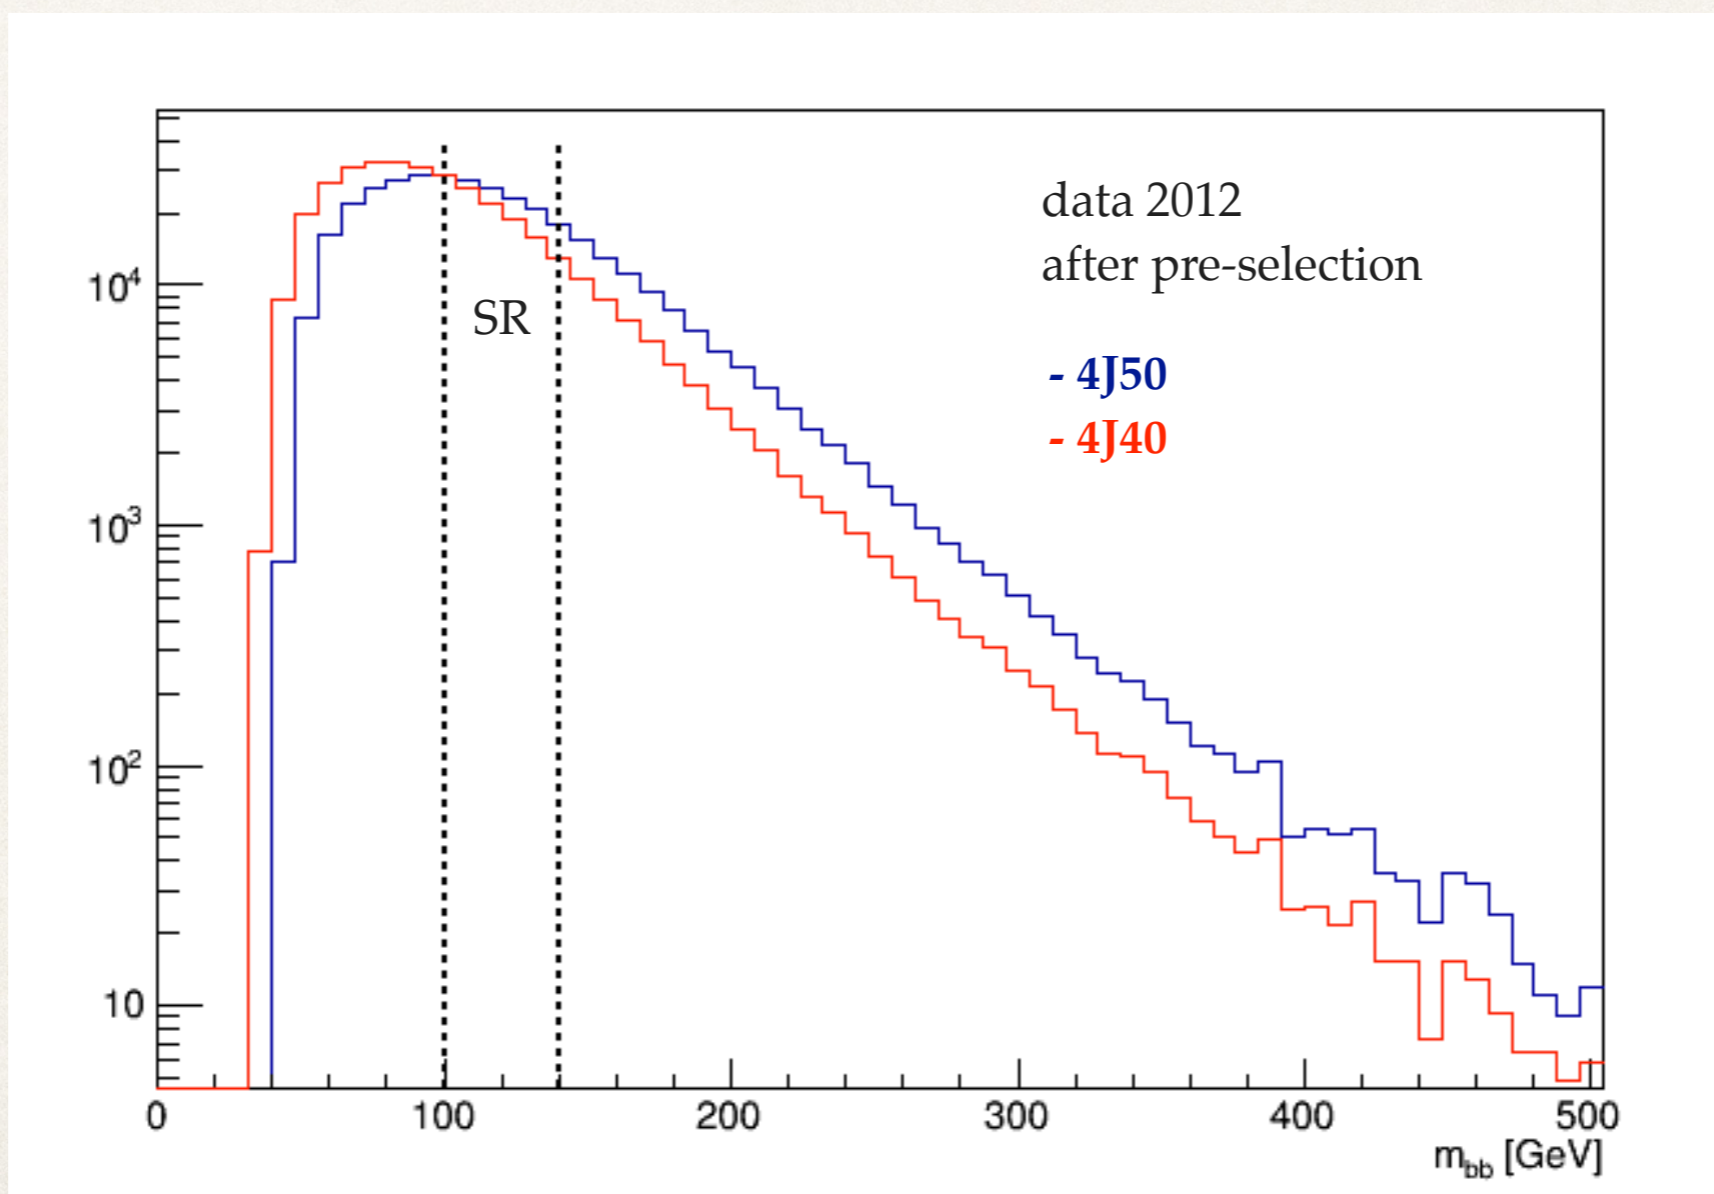

---

- ❖ high stat. mc11 signal samples (VBF and gg filtered) AODs done on Saturday; D3PDs requested and running (next week?)
- ❖ report at last HSG5 (<https://indico.cern.ch/event/281796/contribution/4/material/slides/0.pdf>)
  - ❖ b-jet calibrations → conclusione ?
  - ❖ work below trigger plateau → sembra OK (ttH fa lo stesso), ma avremmo bisogno di qualcosa di concreto
  - ❖ re-visiting event selection and MVA → OK, on-going
  - ❖ data control sample → anti b-tag sembra non percorribile, ritorno ai 5-jets
  - ❖ internal note → prima versione in ~2 settimane

# 4J40 vs. 4J50

- ❖ Moving to a lower  $p_T$  threshold will also help in having a bit kinder  $m_{bb}$  left sideband shape:

\*\*\* 4J40 is  
normalized to 4J50  
for shape's  
comparison

# My to-do-list (2-3weeks)

---

1. preparare ntuple 5-jets per Fabrizio
2. continuare lavoro su event selection
3. studio della MVA
4. ripetere 2. e 3. per i mc11 samples
5. scrivere nota

# Need help for (2-3weeks):

---

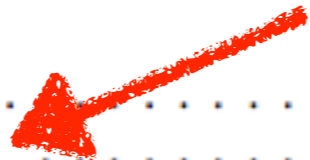

1. background estimate (Fabrizio)
2. trigger below plateau (?)
3. scrivere alcuni dei paragrafi (many)
4. *trigger 2015 (me & Andrea Fa.) realisticamente non avremo avanzamenti su questa timescale —> puntiamo ai workshops (trigger e Higgs)*

+ help

chi si incarica del trigger below plateau

cross-checks di Fabrizio e Carlo

quando avremo una strategia

strategia per le sistematiche standard (ovviamente non numeri)

DOPO

Dappertutto: cross-check dei senior
