

LUCIFER

- Computing model similar to CUORE but on a smaller scale
- Data storage: few TB/y
 - ▶ Master copy and backup on site desirable
- C++ analysis software based on standard packages: root, gsl, boost, qt libraries
 - ▶ one criticality: need database(postgresql) access at run time
- Prompt Reconstruction for Data Quality Monitoring
 - ▶ Need few CPUs on site (desirable)
- Full Analysis Reprocessing: few tens of CPUs
- Need svn, db, web server
