

Second SPES International Workshop

Wednesday, 28 May 2014

Wednesday 28th May 16:30-18:10 - Sala Villi (16:30 - 18:10)

-Conveners: A. Olmi

time	[id] title	presenter
16:30	[58] Preequilibrium emission: a tool to study dynamic effects and clustering structure in exotic nuclei	MARCHI, T.
16:40	[59] Coulomb-excitation measurements in nuclei around ^{132}Sn	MELON, B.
16:50	[60] Isospin dynamics and thermodynamics in n-rich heavy-ion induced reactions	CASINI, G.
17:00	[61] Study of the shell structure and order to chaos transition in warm rotating nuclei with the radioactive beams of SPES	BENZONI, G.
17:10	[62] Shape coexistence in Kr isotopes towards $N=60$	MODAMIO, V.
17:20	[63] Probing the Island of Stability with SPES beams	VARDACI, E.
17:30	[64] Spectroscopy of proton rich light nuclei with the radioactive ^{17}F beam	MILIN, M.
17:40	[65] Direct Reactions with exotic nuclei in the r-process using an active target	FERNANDEZ DOMINGUEZ, B.
17:50	[66] Closing Remarks	TAIUTI, M.
