

An analytical approach to space charge distortions for TPCs

Space charge
distribution
 $\rho(r, \phi, z)$

$\rho(r, \phi) [\text{C/m}^3]$

$\rho(r, \phi) [\text{C/m}^3]$

NOVEL
ANALYTICAL solution
for a TPC Geometry

E field distortions
 $(\Delta E_r, \Delta E_\phi, \Delta E_z)$

E field distortions
(ΔE_r , ΔE_ϕ , ΔE_z)

CONCLUSION

**Fast and accurate
calculations of drift
distortions within TPCs
due to Space Charges
and more ...**

**LANGEVIN equation
including B-field,
E-field and gas
properties**

Space Point distortions
(Δr , $\Delta\phi$, Δz)
