Recent studies of Smith-Purcell radiation as longitudinal bunch profile monitor

Wednesday, 16 September 2015 19:30 (30 minutes)

We report on the recent studies of Smith-Purcell radiation aimed at developing a longitudinal bunch profile monitor. In particular we report on first measurements of the polarization and azimuthal distribution of the radiation. We also report on studies done in the linac of synchrotron SOLEIL to measure the distribution of Smith-Purcell radiation. Using these results we update our plan to build a single shot Smith-Purcell radiation monitor.

Primary author: Mr DELERUE, Nicolas (LAL, CNRS and Université Paris-Sud 11)

Presenter: Mr DELERUE, Nicolas (LAL, CNRS and Université Paris-Sud 11)

Session Classification: Poster Session 2 (WG5-WG6-WG7) and Wine

Track Classification: WG5 - High-gradient plasma structures/Advanced beam diagnostics
