

# INFN + NI Collaboration Agreement

Augusto Mandelli

Scientific Research & Big Physics Manager, Europe

National Instruments

# National Instruments - What We Do

NI combines graphical programming software with modular hardware, leveraging the latest technologies.

Low-Cost Modular Measurement and Control Hardware

Productive Software Development Tools

Highly Integrated Systems Platforms

# Diversity of Applications – Multitude of Benefits

Scientific Research and Big Physics

# MEASUREMENTS, CONTROL AND DIAGNOSTICS

# INFN – What We Do

INFN is the Italian research agency dedicated to the study of the fundamental constituents of matter and the laws

# INFN and Big Physics around the Globe

# WHY A COLLABORATION AGREEMENT

Good excuse for a beer:30!

# Rationale behind : NI

## NI Goals

- Leverage basic research to validate and test latest technologies & concepts (SkyLine, Big Analog Data - BAD,..)
- Get an R&D uplift effect
- Push NI platform at LSI – from FPGA-enabled PXIe through cRIO all the way down to Tecate

## NI Strength Points

- Product certification and in-depth testing – same products used in other critical applications e.g medical applications
- RASM – Reliability, Availability, Serviceability and Maintainability
- Long term support strategy (10+ years)
- Full blown Linux roadmap in place
- A focused SR&BP Team and Strategy do exist
- NI already collaborate with most known WW Facilities and Experiments

# Rationale Behind: INFN

## INFN Goals

- Gain a preferential path towards the industrial world
- Help to better define and assess “buy vs build” policies
- Bring !CHAOS R&D project to an adequate level of maturity
- establish a relationship of trust and exchange for the hardware/software development plans, their application, long term support, optimization, and more

## INFN Strength Points

- INFN is a top class Research Lab in HEP >> branding effect, increased credibility
- Present and future participation/investments in the construction of major equipment for big physics and application for society - health, computing...
- !CHAOS is an approved and funded R&D by Italian ministry of research project intersecting one or more NI strategic areas (BAD, asset management)
