MRPC detector for MAMBO photonuclear experiment in Bonn

Wednesday, May 27, 2015 9:30 AM (0 minutes)

A MRPC detector should be installed in order to cover the forward angle in the MAMBO experiment in Bonn where is used as TOF detector located at 1 m from the target. This detector use four sealed stacks in order to reach time resolution of the order of 30-40 ps.

First commissioning data is also showed.
