

# ACTIVITIES PLAN

Eugenio

# PHYSICS: WHAT?

- Radiative Bhabha ( BBREM )
- Pairs production ( Diag36 )
- Touschek (Manuela's tool)
- Beam gas ( Turtle? Manuela's tool?)
- Beam halo (Life track?)
- Injection, Catastrophic events ( ? )

# IR DESIGN

- The IR now coded in GDML is outdated
- Mike Sullivan designed a new one
- Who is going to translate in GDML the new IR design? ( ~1 week )

*Antisolenoid* →

*Cryostat* →

*QF1*

*QDOL*

*LER* ← *QD0*

*HER*

M. Sullivan, K. Bartsche  
F&SB-IT-ILC-HER-P3  
F&SB-IT-ILC-LER-P3

47 1510  
K&E 10 X 10 TO THE CENTIMETER #25 X 38 CM.  
REUFFEL & ESSER CO. MADE IN U.S.A.

# TIME LINE: WHEN?

- Radiative Bhabha ( BBREM )
- Pairs production ( Diag36 )
- Touschek (Manuela's tool)
- Beam gas ( Turtle? Manuela's tool? January?)
- Beam halo (Life track?)
- Injection, Catastrophic events ( ? )

January

# CODE DEVELOPMENT

- Monte Carlo truth?
- New scorers for doses?
- New informations in the ntuple?

# NON PHYSICAL PARAMETERS

- Production cuts: tuning speed vs accuracy
  - Small pre production?
- Physics list: we have to include neutron production

# CPU & DISK

- Padova Farm (Roberto Stroili)
- Xrootd server to store and distribute the data
- Front end machine for code test & development?
- Job size: book keeping complexity vs speed

# MAN POWER

- Book keeping?
- Job submission and management?
- If there will be a small pre production: 1 week person /detector in January is needed
