What next - Fisica Fondamentale

Monday, 4 May 2015 - Wednesday, 6 May 2015

Firenze, GGI

Scientific Programme

The conference will be held under the auspices of Italian INFN (National Institute for Nuclear Physics) and will focus on
1) cold anti-atoms;
2) gravity and axions;
3) quantum simulations;
3) cold atoms and cold atomic lattices;
4) lattice gauge theories;
5) quantum optical applications and quantum communication.
