

MPGD 2015

4TH INTERNATIONAL CONFERENCE ON MICRO
PATTERN GASEOUS DETECTORS
(12-15 OCTOBER 2015)

RD51 COLLABORATION MEETING (16-17 OCTOBER 2015)

October 2015

3rd Bulletin

The 4th Conference on Micro-Pattern Gaseous Detector, MPGD2015 (<http://mpgd2015.ts.infn.it/>), that will take place from 12 to 15 October 2015 in Trieste, Italy, is starting soon.

Please, find in the following some relevant information.

- **Weather**

In October in Trieste it is difficult to predict the weather: please be prepared both to mild days and to windy and cold days.

- **Slides**

Please load yourself the slides of your oral presentation onto the Conference INDICO page before the session starts: the program is dense and we are obliged to skip the talks for which, at the beginning of the session, the slides are not available.

- **Posters**

The maximum poster size (portrait orientation) is A0.

All the posters will be available during the whole Conference period in the hall where the coffee is served during the coffee breaks. There are two dedicated sessions, the first on Tuesday 13 October afternoon, the second one on Thursday 15 October morning.

The Local Organizing Committee and the Conference Staff are looking forward to welcoming you in Trieste.
